## Encap GREEN Encapsulation Detergent and Deoderizer

**Revolutionary "Bio-Based" blend  
with a unique copolymer**

"Cutting Edge" Technology

- Slices through grease, dirt & grime that competitive non-green products leave behind... even on Olefin and Polyester!
- Penetrates and emulsifies the sticky film that binds dirt to carpet and upholstery fibers.
- Shatters into tiny particles to be vacuumed away when dry.
- Deodorizes as it cleans!
- Great for both commercial and residential.
- More than 99.70% readily biodegradable at use dilution.
- Light, Pleasant Citrus Scent.

**Ingredients:** Proprietary... Unique plant derived blend with brittle drying copolymer.

**Application:** (Shake well before mixing... See dilution chart for dilution ratios)

- Pre-vacuum or pile lift carpet to remove dry particulate soil.
- Can be applied with any normal method of applying pre-spray such as a pump-up sprayer or a gravity fed system such as used with a Cimex & some rotary machines.

- Depending on application method and degree of soiling, apply at 200 - 400 SF per gallon.
- For best results, agitate the solution into the carpet pile with a high agitation machine such as an Oscillating Pad, Rotary Bonnet, Cimex, or Counter-Rotating Brush type machine.

**Soil Removal Methods:**

- **Encapsulation only method:** Remove encapsulated soil, by vacuuming thoroughly when carpet is dry or have your client vacuum at the next scheduled vacuuming interval.
- **Combination method... Also called PadCapping or BonnetCapping:** To remove the majority of the soil, simply clean as usual using a bonnet or oscillating pad machine. When the carpet has dried it can then be vacuumed to remove any remaining encapsulated soil.
- **Hot Water Extraction:** Apply encapGREEN, agitate then rinse with any extraction machine as normal... If all product and dirt isn't completely extracted, it will dry brittle and will be vacuumed away during routine vacuuming by the client.

**Cautions:**

- Test all carpet for color fastness before using any carpet cleaning product.
- Keep out of the reach of children.
- pH 8.5 - 8.8 at 1:32 use dilution.
- May be an Eye and skin irritant... Read MSDS available at [www.vacaway.com](http://www.vacaway.com)
- Never take internally.
- Do not re-use container. Dispose of this container according to government regulations.
- Use in well ventilated area.
- For use on colorfast synthetic carpet (should always be pretested before used on natural fibers).
- For professional use only.

Dilution Chart		
Application	Product	Water
Average Soiling	4 oz	1 gal
Heavy Soiling	8 oz	1 gal
Super Spotter	16 oz	1 gal
Anti-Wicking Agent	32 oz	1 gal
Odor Removal	4 to 16 oz	1 gal

One U.S. Gallon

Blended in the USA for The Cleaner Image, 1037 Lakeview Dr, Hermitage, TN 37076 615-449-0708
